RE: Proposed Hartsville, TN uranium plant

Mr. Lesar,

I am writing to voice my adamant displeasure with the idea of a uranium enrichment facility in the Hartsville, TN area. It's not that I don't want it in my back yard; I don't want it anywhere. We need to curb our energy use, find alternative sources of energy, and most importantly stop poisoning our planet with nuclear waste. Tennessee is a beautiful state. I hike near Hartsville regularly. We already have TVA mucking everything up every chance they get. We don't need more energy companies here destroying my state. Virtually no local hiring will be done to staff the plant, aside from the janitorial staff maybe. Nobody in the Hartsville area is qualified.

In short, nobody wants this plant, aside from Louisiana Energy Services of course. Please do the right thing and tell them to go somewhere else. Maybe they should build it in Louisiana. That way they can destroy their own state and leave ours alone. The people are speaking very loudly and very clearly about this issue Mr. Lesar. Please don't bow to corporate pressure and big money. Try not to think about how much money Louisiana Energy Services has donated to your political party. Don't let any politicians sway your decision. Be a man, stand up for what the people are demanding and tell Louisiana Energy Services to shove it.

Thanks,

  
Jeremy Childs
